About Taha Impex

TWO DECADES OF DRIVING TEXTILE INNOVATION

Taha Impex – Trusted Dealer in Narrow Fabric Machinery

Established in 2003 and registered office in Surat, Gujarat – India's textile capital and the "Silk City" – Taha Impex is a trusted authorized dealer and supplier in the textile industry. With over two decades of experience and expertise, we have built a strong reputation for reliability and excellence in the textile machinery sector.

Taha Impex is ISO 9001:2015 Certified Co into manufacturing & Import of Narrow Fabrics Machineries since 2004.

We are Agents of Brand " **JINGYI** " "**HENGHUI**" & "**PRINISH**"

We are supplying High speed Needle looms , Crochet's & Braiding machines.

Also supplying Ancillary Machines like Warping, Finishing, Festooning, Layering & Rolling Machines.

- ◆ Crochet Machines
- ◆ Needle Loom Machines

- ◆ Braiding Machines

- ◆ Needle Loom Machines

- ◆ Ancillary Machines
- ◆ Spare Parts

OUR CERTIFICATIONS

Authorized. Certified. Trusted.

At Taha Impex, we don't just meet expectations – we're officially certified to exceed them. Our credentials reflect our commitment to quality, reliability, and trust across the textile industry.

Ancillary Machines

Automatic Warping Machine

No. of Yarn (Piece)	Voltage (V)	Power	Speed (T/M)	Pressure (P)	Middle Distance (M)
192	220	2	0-300	5	3
160	220	2	0-300	5	3
140	220	2	0-300	5	3

High Speed Automatic Rubber Warping Machine

No. of sizing (Piece)	Voltage (V)	Power	Speed (T/M)	Pressure (P)	Middle Distance (M)
60	220	2	0-300	5	3
90	220	2	0-300	5	3

Ironing Machine

No. of Fixing (Piece)	Voltage (v)	Power	Speed (T/M)	Heating Way	Temperature (°C)
1-4	380	2	0-30	Electric	150-300
1-4	380	2	0-30	Electric	150-300
1-4	380	2	0-30	Gas	150-300
1-4	380	2	0-30	Gas	150-300

Ironing Machine

No. of Fixing (Piece)	Voltage (v)	Power	Speed (T/M)	Heating Way	Temperature (°C)
1-4	380	2	0-30	Electric	150-300
1-4	380	2	0-30	Gas	150-300

DRG Series Rubber / Spandex Covering Machine

Parameter	Specification
Production heads	80 heads in double covering
Number of spindles	32 spindles/sect × 5 sect
Spindles gauge	200mm
Mechanical spindle speed	15000–17000 R.P.M
Twist per meter (TPM)	200–3500 TPM
Aluminum bobbin (mm)	140×Φ68 / 140×Φ76 / 140×Φ84, bore 30
Covered yarn elongation rate	From 1.5–6.0
Installed power (KW)	5.5+7.5 or 5.5+11
Twist direction	S or Z
Forming mode	Mechanical / Electronic
Traverse length	160mm
Spindle belt length	20200mm
Spandex feeder	Choose according to requirement

Tape Sorting Machine

Its widely used for tape sorting that enable them in order during bleaching and dyeing.

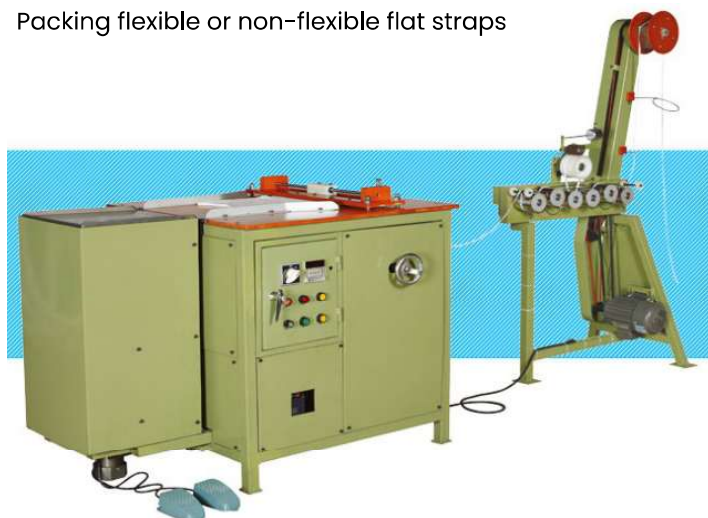

JYW400/AP Warping Machine

Application	Optimally and flexibly used in the warping of various kinds of nylon, fiber, cotton yarn, etc.
Beam Specification	Diameter of the application beam is below 400 mm, diameter of inside hole is 17 mm or 20 mm, inner length is 255 mm. We also specially make the machine according to customer requirements.
Speed Adjustment	Frequency control: 0 ~ 350 r/min (Line speed: 0 ~ 390 m/min)
Set Length	Use the counter to set any warp length according to the requirement.
Width & Density Adjustment	Adopt 4 pieces of W-reed; adjust width and the left and right device randomly.
Motor	2 HP / 4P / 380V 3 Phase

Festooning Machine

Packing flexible or non-flexible flat straps

Tape Rolling Machine

PLC automatic tipping machine

With rubber lace feeder and shoelace collection device

DRW2 Sample Warping Machine

Advantages:

Automatic PLC control system, big screen and intelligent interface to distinguish human-computer interaction.

Clearly program settings, warping numbers and yards can be shown on the system, operated and handled.

Warping flatly and neatly, length is accurate, coiling bobbin is neat, smooth and flat.

Full automatic control, auto stop alarm light settled.

Save yarn, save time, increase efficiency of sampling and small quantity orders.

Application:

This series machines are applied to the produce: water hose, shower hose, stainless steel high-pressure hose, irrigation pipe, and other kinds high pressure pipe, etc.

Model	Voltage (V)	Power (kW)	RPM Speed (RPM)	Air Pressure (P)	Size (MM)	Machine Dimensions (MM)	Weight (KG)
DRW01	220/380	0.75	260	2	260/300	1380×680×980	130

Automatic Tape Rolling Machine

This machine use to collect and pack the tapes during weaving

Narrow Fabric Packing Machine

Its widely used to pack the thin and light narrow fabric into a carton in order.

Automatic Winding Machine
